# IntelliBoard
Learning Analytics Platform

Drive action from **your data.**

Meet a powerful learning analytics platform with predictive modeling that will help you achieve your retention, engagement, and compliance goals.

✓ Improve Learning Outcomes
Use your data sources to track learners' progress toward course completion, identify at-risk learners, proactively intervene, and tie your success metrics to learning data.

✓ Grow Retention & Engagement
Transform your organization from reactive to proactive by elevating your learning data to make data-driven decisions and increase engagement, persistence, and retention.

✓ Save Costs & Increase Efficiency
Build reports easily, securely share insights with stakeholders, and automate notifications identifying struggling learners to drive successful interventions.

✓ Ensure Compliance
Adhere to legal and ethical guidelines, confirming each learner receives and completes the appropriate level of education and training.

## Integrate Your Data With All of Your Learning Systems

Platform Capabilities

Integrate
Bring your data from LMS, SIS, collaboration, attendance, plus

Analyze
Get insights with pre-built visualization for each stakeholder

Communicate
Create your own notification program and track communication

Build
Build and customize your own reports and dashboards

Identify
Set your rules to identify at risk learners and dollars

Automate
Schedule processing updates from your data sources

Collaborate
Share your reports and dashboards with your peers

Predict
Intervene early with machine learning models based on your data

Secure
Ensure privacy and compliance with role-based permissions

The IntelliBoard Learning Analytics Platform is designed to help organizations improve learning outcomes. Using data from a wide array of sources like learning management systems, student information systems, collaboration tools, and human resource systems coupled with predictive models, organizations can achieve their retention, engagement, and compliance goals while gaining efficiencies.

By integrating with over 20 leading learning platforms, 50 built-in data sets, and using predictive modeling techniques, the platform collects and analyzes data about learners and their contexts. This information provides decision-makers with data-driven insights to inform their decisions and help impove learning experiences.
